

CLARO-T

New Generation Lift & Shift Ceiling Panels

CLARO-T

New Generation Lift & Shift Ceiling Panels

Decoustics presents the evolution of the acoustical ceiling panel. Combining patent-pending clip technology and metal edges; Claro-T is the most durable concealed grid fiberglass ceiling tile available. Finally, T-bar* ceilings can have that 'custom look'.

Concealed Grid

Our tight 3/16" reveal conceals the grid for a beautiful appearing ceiling. Patent-pending clips provide straight joint lines across the entire ceiling.

Claro Acoustically Transparent Coating

Claro has the classic appearance of drywall for a modern and monolithic look.

Metal Edge Panels

Patent-pending panel technology yields a very resilient and durable edge that will stand up to panel removal time after time.

Vapour Barrier Backed

All Claro-T panels come with a vapor barrier backing, preventing premature soiling due to air movement.

Standard Sizes

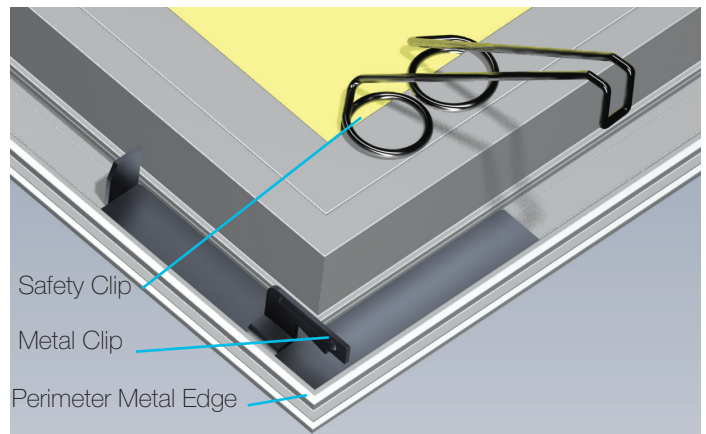

4'x4' (1219mm x 1219mm), 2'x6' (610mm x 1829mm) and 2'x8' (610mm x 2438mm)

Decoustics' Claro Finish

Concealed grid with 3/16" reveal

* Mounts on heavy duty T-bar grid

Claro-T Installation

Step #1

1. Align the Claro-T Lift and Shift panel with the T-Bar opening.

Step #2

2. Insert the leading panel edge onto the main T-Bar, while swinging the opposite side of the panel up above the T-Bar.

Step #3

3. Slide panels backwards to engage clips to the T-Bar.

Step #4

4. When properly installed Claro-T Lift and Shift panels feature a uniform, level and consistent ceiling installation.

Light Reflectance

90% - standard white CSW-100

Fire Testing

In accordance with National Building Code requirements, and ASTM E84 test protocol, Decoustics has complete panel assemblies tested to the ASTM E84 standard, at independent laboratories. Test data for the panel components are also available.

ASTM E84 Test Results

Flamespread less than 25, Smoke Developed less than 25.

Panel Type	Thickness	Finish	Mounting	Frequency (Hz)						NRC	SAA
				125	250	500	1000	2000	4000
