

Nuvola®  
Acoustical Clouds and Shapes

## Nuvola® Acoustical Clouds and Shapes

Create a unique, inviting space with fully customized shapes that are suspended from the ceiling. Decoustics Nuvola acoustical clouds and shapes are available completely customized. You determine the shape, curve and color, the only limitation to your ceiling is your imagination.

### The Decoustics Difference

Nuvola panels are finished on all faces, when suspended at various heights and angles a uniform appearance is presented regardless of the viewpoint. Nuvola shapes can be installed individually to identify a space or grouped together to create unique configurations.

### Effortless Installation

Nuvola panels use a unique anchor hanger and spiral spring to ease installation. The simple components allow the installer to efficiently install anchor points on the back of the panel without the use of tools.

## Technical Attributes

- Nuvola is finished on all six panel faces
- Shapes and clouds can be custom color matched to any paint chip
- 90% light reflectance when Decoustics standard Claro® white finish is applied
- Flame spread less than 25, smoke developed less than 25 according to ASTM E 84
- NRC 0.90 with E400 mounting
- Minimum radii of 30" (760mm)

Utilizing a locator template, the spiral spring anchor hanger is installed by simply twisting clockwise into the panel body. The anchor hanger is designed to bottom-out on the back of the panel to prevent penetration through the face. This is a quick and efficient method of installing hanging points without the use of installation tools.
