

Claro[®]

Custom Acoustical Finishes

including

Metallo[™]

Claro[®]

Claro and Metallo are acoustically transparent coating on acoustic panels and provides superb sound absorbing properties. Claro has the classic appearance of drywall or plaster and can be custom color matched to a paint chip.

Light Reflectance

90% - standard white CSW-100

Fire Testing

In accordance with National Building Code requirements, and ASTM E84 test protocol, Decoustics has complete panel assemblies tested to the ASTM E84 standard, at independent laboratories. Test data for the panel components are also available.

ASTM E84 Test Results

Flamespread 19, Smoke Developed 19.

This impressive boardroom ceiling uses Ceilencio, which features easy installation and Claro finished panels which release downward.

Panel/Edge Reveal Detail

Continuous 1-1/2" wide closure strip

The irregular curvature of the 2-1/4 inch thick panels provides a unique architectural element and exceptional acoustic performance for the renovated offices of this financial management company.

Metallo provides a contemporary look by integrating metalized components to provide luster and sparkle.

Custom-curved panels in a Metallo finish provide a dramatic and innovative solution to the challenging acoustical environment of this casino lounge. The specially-designed, lightweight ceiling panels are suspended 3 stories above the floor with the use of only a single rod.

College of Art auditorium using a combination of reflective and 2" absorptive panels finished in Metallo.

Custom Colors for Claro and Metallo

Claro is standard white unless otherwise specified. Custom colors for Claro and Metallo can be achieved by matching to a paint chip.

Claro ceiling panels are custom colored to match stone finish on walls in this unique observatory stairway.

Claro[®]

Featured in Large Panels
